I am a tech enthusiast, I have a **passion for problem-solving and a deep love for data structures and algorithms**. Thirsty for knowledge and want to learn from the core. I am patient enough to pursue my interests, and I have confidence in myself. I have been **programming for five years**, which has given me valuable experience and knowledge to tackle new challenges and continue my growth.

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++(Advanced), Go, JavaScript

Developer Tools: Linux, Git, Docker, Kubernetes

Cloud/Databases: MySQL

Areas of Interest: Software development, Data Structure, Problem solving, Mathematics, Machine Learning, Artificial Intelligence, Computer Systems, Sports and Travelling.

AWARDS AND ACHIEVEMENTS

•ICPC Asia -West Continent Finalist-2021

24 December, 2022

–I attended ICPC Asia West Continent Final-2021.

•ICPC Asia Dhaka Regional

2019 - 2023

–I attended ICPC Asia Dhaka Regional 2019, 2020 and 2021.

•Competitive Programming

January 2019 - Now

–Almost (2500+ and counting) problems solved on several online platform.

–Participated 500+ contests on several online and offline platform.

–Codeforces Max-rating 1778. Handle: [@naeem4265](#)

–Codechef Max-rating 1890. Handle: [@naeem4265](#)

•Judge and Problem Setter IDPC-2021, IDPC-2022 and IDPC-2023

January 2020 - Now

–For the last three events Intra DUET Programming Contest(IDPC) 2021, 2022 and 2023, I served as both a judge and a problem setter.

PROJECTS

•Book API-Server using Go

September 2023

API server

– This project is designed using Go, where I developed a book API server. The project utilizes the Chi routing framework to handle incoming requests and provide corresponding responses. With this API server, I've implemented functionalities to add, update, delete, and read books.

•Covid-19 patient health monitoring in quarantine

January 2021 - June 2021

Hardware and Software based project

– Tools & technologies used: Arduino UNO, WIFI module, Display, Sensors and Google Firebase

– This is IoT based health monitoring system of Covid-19 patient in quarantine. The goal of this system is to enable remote monitoring of multiple patients over the internet. My role in this project was to design, connect to the database, and manage the database.

EDUCATION

•Dhaka University of Engineering and Technology, Gazipur

March 2019 - June 2023

– BSc, Computer Science and Engineering

CGPA: 3.29

LEADERSHIP EXPERIENCES (SELECTED)

•President - DUET Computer Society

June 2022 - June 2023

–I managed to train in Algorithm and Data Structure and organized IDPC-2023 as well as many online and offline events.

•Volunteer - DUET CSE Fest-2019

26-27 April, 2019
